Applications / Projects Built

GreenLight

GitHub: <https://github.com/sayex/Green-Light>

Live: [GREENLIGHT](#)

- Project Goals and Role
 - Front end project required utilizing JavaScript, JQUERY, and AJAX. Our group used Spotify API and Bands In Town API to create our application.
 - We used team coding to make sure everyone knew how everything worked and build on each of our strengths. Utilizing new technology of Node.js, popovers.js.
 - QA – APIs, back end design, and team coding. Coded Spotify OAuth, node.js and Bands in town API, group coding on Spotify API

Milliways

Github: <https://github.com/sayex/Milliways>

Live: [Milliways](#)
