Applications / Projects Built

GreenLight Github: <https://github.com/sayex/Green-Light>

Project Link: [GREENLIGHT](#)

- Project Goals
 - This we a front end Project utilizing Javascript, JQUERY, and AJAX to create an applications. Our group decided to use Spotify API and Bands In Town API to create an app that would search for an artist return the first 9 albums and the tracks, show if they were touring and where, including a link to buy tickets.
 - We used team coding to make sure everyone knew how everything worked and build on each of our strengths
 - Group Members
 - Cheree Nielson: Team Lead – front end design and team coding
 - Eric Sayer: QA – APIs, back end design, and team coding
 - Stan Bakalov: Presentation Specialist – APIs, back end design, and team coding
-
